That's what I thought. This is a low priority on my end so whenever you get to it is fine by me.

Glad to hear SVFs are decent. I've already been looking at the Lake Helena metals data. Thanks for processing the data so fast.

I've been focusing on field season forms so I haven't loaded your EDD yet. I was thinking about it today though, so hopefully I'll get to it soon. I'll send you a confirmation once it's loaded.

I think everything is going ok with Atkins. I haven't had any interaction with them since the beginning of the field season. The SVFs I've processed have been good and I'm receiving the lab data as it's analyzed.

Hi Jolene:

I know you're really busy this time of year with sampling but I wanted to follow up with you on this EDD I sent to you last month. Has it been

successfully uploaded? If so, could you send me an updated submittal form (see attached) with the DEQ acceptance part filled out.

If you haven't got to it yet, don't worry there is no immediate need. I just wanted to check because you usually send a confirmation email.

On that note, how is everything going with ATKINs coordination? I know they were very late in getting Steve a SAP for the Yaak/Tobacco/Hyalite nutrients monitoring that occurred last week, which I'll have to talk with them about. They've been out sampling so much I think they are falling behind on writing SAPs. I haven't heard back from Steve but I assume everything worked out.

Thanks,

*(See attached file: EPA-TEMP-SHADE-FLOW-2011\_Submittal-Form.pdf)*
